## Learning from Experience

[Space to insert photos/images]

### We are proud of

- our residents feeling safe living here
- the care we provide to our residents
- the variety of food we offer to residents

### Examples of good practice

- Since 2019, we have a Food Committee which is made up of residents and staff. This enables residents to provide feedback on the food we offer.
- Our staff conduct a brief monthly survey with our residents to get their feedback on the food we offer.

### We will work to improve

- residents' involvement in decision-making
- activities and entertainment for residents
- how residents spend their time here

### Examples of how we will do this

- We will set up an '**Activities Committee**' made up of our residents and supported by our Activities Coordinator. The committee will meet bi-monthly.
- Our Activities Coordinator will hold quarterly check-ins with our residents to ensure they are supported in activities and how they spend their day.
